The ocean plays many important roles in our climate. The ocean records changes in climate, modifies those changes, and is significantly impacted by climate. We will explore various interactions between the ocean and climate systems.

Climate and the Ocean
July 10 - July 14, 2017 ~ 8:30AM - 3:30PM
For Teachers of Grades K-8

Join us for a summer institute designed to deepen teachers’ knowledge of Science and Engineering Practices, Cross-Cutting Concepts, and Disciplinary Core Ideas as identified in the Next Generation Science Standards (NGSS).

The program fee is $250 for registrations received by 4/7/17 and $300 after 4/7. Lunch will be served.

For more information and application see https://teacherprep.princeton.edu/professional-learning/quest-2017 or contact Dr. Anne Catena at acatena@princeton.edu or (609) 258-2536.

This program will take place at Princeton University with content experts Danielle Schmitt, Geosciences and Dr. Steve Carson, J.M. Witherspoon MS and is sponsored by the Cooperative Institute for Climate Science.
